

Indonesia has started to execute its National Toys Safety Directive since 30th April, 2014. Being affected by this new regulation, the amount of toys exported from Quanzhou to Indonesia remained US\$0 from January to April this year, compared with last year's record of US\$ 223,900. Shantao Chenghai, as China major toy producer, has obviously been impacted by this new regulation.

Therefore, we suggest all the enterprises get to know this new regulation delay no more, be aware of the changes of Indonesia major product technology, be updated with the trend of 'exported toys' quality and safety, upgrade their production techniques by technology innovation, seek potential organizations to obtain the SNI certificate, which helps to assure their products legally for entering Indonesia toys market.

TÜV SÜD Shen Zhen and Hong Kong Toys laboratories have been accredited by Indonesia SNI. In order to help companies in Shantou successfully export products to Indonesia, we are honored to invite the Indonesian experts specialized in toys importation to analysis the relevant requirements of toys exported to Indonesia.

Time 14:00 – 17:00, 27th September, 2014
